Countdown 2979 Days To The Moon is the definitive account of the Apollo 11 mission. Filled with stunning photography and in-depth interviews, this book provides a captivating glimpse into the planning, preparation, and execution of this historic event.

The book begins with the early days of the space race, when the United States and the Soviet Union were competing to be the first to send a man into space. The author, Richard Paul, takes us inside the halls of NASA, where scientists and engineers worked tirelessly to develop the rockets, spacecraft, and equipment that would make the Apollo 11 mission possible.

We also meet the astronauts who were chosen to make the journey to the Moon. Neil Armstrong, Buzz Aldrin, and Michael Collins were all exceptional pilots and engineers, and they were also men of great courage and determination. They knew that they were undertaking a dangerous mission, but they were willing to risk their lives to advance the cause of human knowledge.

The book follows the astronauts through their training, their launch, and their journey to the Moon. We experience the excitement and the anxiety of the astronauts as they approach their destination. We feel the weight of the world on their shoulders as they prepare to take that first step onto the lunar surface.

The landing on the Moon was a success, but it was only the beginning of the astronauts' journey. They had to spend two days on the Moon, conducting experiments and collecting samples. They also had to find a way to get back to the Earth. The return journey was just as dangerous as the trip to the Moon, and the astronauts were relieved when they finally splashed down in the Pacific Ocean.

The Apollo 11 mission was a triumph for the United States and for all of humanity. It was a testament to the power of human ingenuity and determination. *Countdown 2979 Days To The Moon* is an engrossing account of this historic event, and it is a must-read for anyone who is interested in space exploration.
